

# WATER

THE question of sufficient and satisfactory water supply is one of vital interest and universal importance. There are thousands of homes in the country, villages and in the suburban districts that have been equipped with private water systems which gives the same advantages and conveniences that are found in city homes that are supplied by public water systems—but for these comparatively few homes so equipped, there are many times their number that are not.

That the owners of many of those homes have not improved their water systems is due to a mistaken idea about the expense of doing so, and often times because they do not know how to go about it and obtain the best results. Right here is where the Pratt-Gilbert Company are in position to extend to you, without cost to you—the counsel and direction of our experts in this particular line.

If you are going to be in the market for a water system of any description—be sure that you consult with us before going into the detail of installation—whether it merely be for a pump and cylinder, a domestic plant complete with a SAMSON wind mill, or engine—tank and tower, or for stock-watering purposes or the equipment of an irrigation enterprise—consult us—and secure our attractive figures. Our experts can "harness" any kind of a water proposition that may confront you.
